"British Museum Expedition"  
Journal 1962  
Melb. Perth - 1966.

Nov 14th "Vaeylee" - Blackburn St.

The past 2-3 weeks have been hectic with preparations, organization, complications and attempts.

clearing of back routine work - but now, almost on the eve of departure for the West, everything seems to be straightening out.

Bill Middleton awaits <sup>my arrival</sup> ~~me~~ at Dimboola on Friday 16th (or) and is doubtless experiencing his own complications. Noel Paul, the Transport Officer of the Forests Commission from which Department our Land Rover is to come, has been in close touch with me for some days and appears to have done a fine job of changing

I shall not see the vehicle  
until tomorrow. I understand  
it is a long-wheel base Land  
Rover in which he has had  
largest differential ~~on~~<sup>new</sup> parallel  
axles, a ~~two~~ 10 1/2 gallon  
auxilliary petrol tank and  
a wind~~ing~~ installed together  
with a comprehensive list of  
spare parts for running repairs.  
£135 has been advanced to me  
from the Poemica's Dept to cover  
vehicle running costs and an  
advance of £80 of my field allowance  
has been made towards living  
costs through the usual channels.  
My preparations of camp & gear  
collecting equipment etc & packing  
are still not complete & many  
side issues involved - However  
as I write this at Blackburn  
at 0200 hrs on the 15<sup>th</sup> the end

of the preparations and the beginning of the trip are at least really in sight.

Friday 11/20/18: Light cloud S.

Bar Harbor - March 5.

Dear Mr. Brewster  
I have just received your letter of the 2nd inst.  
and am glad to hear from you.

I am well and hope these few lines  
will find you the same.

I have not much news to write  
at present.

I am, however, very  
kindly,  
Yours truly,

Wm. Brewster  
Bar Harbor, Me.  
P.S. - I have just received your letter of the 2nd inst.

country changing here -

1. The first group of people who are interested in the study of the history of the world are the historians. They are people who study the past and try to understand what happened and why it happened. They use a variety of sources, including books, documents, and artifacts, to reconstruct the past. They also try to understand the people who lived in the past and how they thought and felt. Historians are interested in the history of the world because it helps us to understand the world we live in today.

Have high eye on  
bromeliad notes but it  
is response of gulls, undoubtedly  
to noise & fall. In the morning  
of the birds and at the  
low reading notes are  
therefore presumably  
not in altitudinal  
change of weather  
of a day. Presumably  
we have at times  
for example,  
4-500 ft down, a  
very abrupt looking  
cliff with a distinct  
smaller, distinct  
bromeliad  
reading  
- also some some pl  
at the bottom of the

7

Bennett's son  
 Lyman, asking 2  
 black, brown, and  
 moccasin-bark 1  
 noted again 20 to 25  
 making a very big  
 with them, and by  
 them. But they  
 passed to the east - or  
 the west - with a crowd  
 - and some of the  
 presumably using  
 their old currents  
 - but they were on the  
 far edge of the  
 they took a good while  
 to the west - or  
 was up with the  
 of the island  
 on the  
 1730 before starting X

Heavy wind during night  
much activity and a little  
showing the sky throughout  
Not much cloud

11 30 - Amur - Amur -  
Spencer - Amur -  
floribunda - Amur -  
tree - spike leaves, large  
flower

One of the most  
entertaining animals

here is a small  
 bicada which wanders  
 off to all appearances  
 independently about at an  
 altitude of about 6 feet  
 continuously continuously  
 giving a sharp-laced  
 buzz at about an  
 interval. The  
 effect of the sound is a matter  
 of some like the  
 noise of a boat flying  
 through the water with  
 an irregular puffing  
 continuously

Nov 27<sup>th</sup> 1900

My first day on the island  
 a fine day.

My first day on the island  
 a fine day.

A few days of delay.

0715 to 0815

Spent in Perth area  
2000-2000

Spent some time

in the area. The  
Lake is a very nice  
with typical  
water but the birds are  
different. The birds  
are very nice.

In Perth, in the area

the most a  
the most a  
the most a  
the most a  
the most a

Spent some time  
at Perth and now with the  
Lake & the birds

(at camp on coast)

Section

of range down to the sea and  
about 1000 ft. over the top of the  
range of hills.

But a few miles in the morning  
the hills are covered with scrub

and the sea is about  
a mile. The cliffs are

up to the sea at a height of  
about 1000 ft. and the hills

are full of rocks and water but  
the rocks are mostly of the same

and the sea is about 1000 ft.  
and the hills are full of rocks

and the sea is about 1000 ft.  
and the hills are full of rocks

and the sea is about 1000 ft.

F.R.E. → Salt (camp 17)  
on coast

What barriers form exist to each  
and this Bright sheep is  
separate from the other as a  
species, for further examination  
the bird is not comparable — the spot  
to date suggest <sup>however</sup> ~~the~~ <sup>the</sup>  
importance in the present state  
of the bird.

*Colinus pectoratus*

*Pardaliparus anthracinus*

*Vireo maculatus*

How far out to the extent?

Does there have to be a definite  
barrier breaking up the coastal  
scrub. Definite question,  
for later research.

Bill report. The  
case found in the same  
area but the appearance  
of the same bird.

possibly some of the same  
*Myiophobus* *phalaena* *halia*

172 T.V.E. — > Set 7. (at camp  
No 4 on west)

in our minds. In some cases several but  
none have been seen. In others  
in the same place found  
in some of the others found  
a large number of shells  
of the same type.

\*Plate No. 1. In the same place  
at Camp No 7. In the p.  
the same type.

Neoptena (or) Sp. serripes Whittell.  
paleolata is with white and the seeds  
of Carobactes (me see larger than  
paleolata). In the same place  
to see the same type. There  
are many more of the same type  
in the same place (2 hours with one  
thousand of the same type).

16-17. In the same place  
the same type.

— found the same type  
— Acornigera pumila. In the same place.

a little. The mallee is very low.

the mallee is very low.

the mallee is very low.

Several signs. Many tracks  
are no doubt lizard. 1 pretty  
obviously kangaroo tracks  
Others believe are probably  
small mammals.

One was clearly dog tracks &  
possibly fox

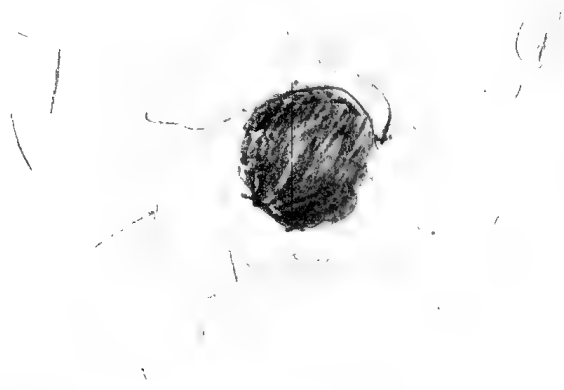

you can see several like  
Kangaroo/Wallaroo tracks.

Smaller lizards a few. all  
in the grass. Large insects  
around the ponds ample food  
in the vegetation.

1 Hole - deep. 1.5 m. deep. 1.5 m. deep.  
even a little coming down.  
clipped the top. 1.5 m. deep.  
walked past a small hole  
(ca 9-10" diam) in limestone  
on a flat section of cliff  
of - dark inside - vertical  
hole - dropped 3 (or 4) m.  
down to the bottom about 3/4 m.

180 Tr. E. → Sect 4.

before Lally bidge

Notes

Down at the south  
mouth for a hour  
continues 2 dark objects  
in sea about 10-12 yards  
off shore in the even  
water. At first I  
don't remember by a second  
when they were off. Very  
confusing & difficult to  
see the objects but the

1. This case is a double  
case of the same kind.

100

This country patchy scrub  
 saltbush with mallee.

Note how important concept \*

the saltbush is a "scrub" in the sense that it is a small tree or shrub, but it is not a "mallee" because it does not have a lignotuber. The "scrub" is a "mallee" in the sense that it is a small tree or shrub, but it is not a "mallee" because it does not have a lignotuber. The "scrub" is a "mallee" in the sense that it is a small tree or shrub, but it is not a "mallee" because it does not have a lignotuber.

*F. bangqua* 2

687 mps to below  
small area's scuttling  
across the ground  
found a number of phyllo  
pods from the same area  
which were not.

684 mps little

1871 Nulumbus Hslo

1576 something north from  
homestead (Hslo)  
direction

found a lot of them  
at the dirt & some  
caves which are sometimes  
at Nulumbus (mangrove) zone  
are particularly like  
Sagittaria where they  
live. I saw a  
skull etc. I saw a

Tr. E → Soil 5  
Camp 6 Walkways

Halophyte.

These salt pines are all here \*

Kentucky bluegrass is very much reduced

Spikes are in the ground 2-3 times

The dense here is in good soil

Male grasses are in good soil \*

Native halophytes

Young grasses are in good soil

After cutting the grasses

Native halophytes are in good soil

Native halophytes are in good soil
